DETAILED ACTION

Response to Amendment

This Office Action is in response to applicant's response filed on September 26, 2005.

Applicant's comments are acknowledged. The Finality from the previous Office Action has been withdrawn.

With regards to the Terminal Disclaimer, as indicated it would be submitted, it currently has not been received and recorded.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 5-17 and 22-27 are rejected under 35 U.S.C. 102(a) as being anticipated by Dennis (U.S. Patent No. 6,860,869). Dennis discloses a surgical seal assembly (10) comprising a valve seal (50) wherein the valve seal (50) further includes a reinforcement layer (64). This layer (64) may be formed, party, from any elastomeric material which expands to accommodate a surgical instrument and forms a seal around the instrument to prevent leakage of fluids, gases and the like. This reinforcement layer (640 is preferably a layer of woven material such as fabric with nylon or spandex type material (stretchable material) encapsulated within silicone or other such elastomeric material.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPO 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPO 619 (CCPA 1970);and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 5-17 and 22-27 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,702,787. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the instant application are merely broader than that of in the U.S. Patent No. 6,702,787. The claims in the U.S. Patent No. 6,702,787 anticipate the claims in the instant applicant. Therefore, the two sets of claims are not patentably distinct.
